### MONEY, STOCKS AND BONDS.

Plenty of Buying and the Upward Movement in Stocks Made Steady Progress. NEW YORK, Aug. 18 .- Money on call was easy, ranging from 2 to 3 per cent., the last loan being made at 212, closing offered at 212 per cent.

Prime mercantile paper, 534 per cent. Sterling exchange was quiet and weak at \$4.83% for sixty-day bills and \$4.85% for demand.

The total sales of stocks to-day were 328,-895 shares, including the following: Atchison, 42,170; Chicago Gas, 10,250; Delaware, Lackawanna & Western, 3,081; Louisville & Nashville, 81,745; Missouri Pacific, 15,345; Northern Pacific preferred, 8,660; Richmond & West Point, 4,527; St. Paul, 41,-056; Union Pacific, 36,270; Western Union,

The stock market to-day was again active and strong, with an unmistakable broadening tendency, and materially higher figures were reached in everything on the list, and this in the face of heavy realizations and the strenuous efforts of the "bears" to prevent any further advance in prices. There was a large party who already think that the rise has attained sufficiently large proportions, and that many stocks have been advanced too rapidly, and therefore favor a reaction, but the new buying in the market is of such proportions that against the selling to realize by bears' and for outside centers, including London, the market still advances. To-day at least there appeared to be large buying orders at all conclusions, and the upward movement made steady progress. The relative importance at present of the Union Pacific affair was seen in the steadily diminishing volume of business in that stock, although all the gold shares were still sluggish and feverish. Atchison was again the leader in point of activity, while Louisville & Nashville still led the upward movement, closely followed by Rock Island. The Western operators confined themselves entirely to the Western stocks, and the interest in the movements of the grangers was greater than in that of any other group of stocks on the list, and while everything shared in the general advance, the important movements were confined to those stocks. There were a few sharp advances as usual among the lowpriced specialists, Buffato, Rochester Pittsburg, and Pittsburg &

preferred conspicuous, but the industrials were quite neglected with the one exception of Chicago Gas, which in the early trading was specially strong. The news from the meeting of the directors and creditors of the Union Pacific was reassuring, and while that stock failed to answer until late in the day, prices in the general list crept up from 1 to 2 per cent., with specially sharp gains in a few low-priced shares. After the announcement of the arrangement agreed upon, by which the floating debt of the Union Pacific is to be taken care of there was a selling movement in that stock which wiped out all of its advance, and realizations in the general list became more abundant and prices yielded all along the list, the last hour being marked by a steady, though slow decline. This downward movement, which was helped by the efforts of the traders to bring about a reaction, was sufficient in many cases to entirely wipe out the carly gains, and many of the active stocks actually closed lower

The trading in railroad bonds was again most gratifyingly large, and the temper of the market remained decidedly strong throughout, no sympathy with the late decline in stocks being shown. The active bonds are almost invariably higher, and many material gains were made during the day. The transactions foot up \$2,302,000. Burlington convertibles rose 24; Western New York & Pennsylvania seconds, 2 per

TRADING AT CHICAGO. Wheat Becomes More Easy, but Corn Shows

Signs of Advancing.

CHICAGO, Aug. 18.—The audience in the public gallery overlooking the trading pits was as overflowing to-day as on any of the three preceding days of the excitement, but | 13.20@13.25e; spot Rio dull and steady; fair the performance they stood to observe lacked the absorbing stures of interest which were witnessed on Saturday and Monday. The close of the market yesterday at \$1.03 for December wheat left it denuded of the sensational addenda which the excitement had added to a naturally strong condition of affairs. The foreign markets had lost a good deal of yesterday's buoyancy, and, like the trade on this side, appeared to crave rest. The principal fluctuations in December wheat up to about 10 minutes of the close of the session were as follows: Opened at from \$1.03 to \$1.0312. then sold at \$1.02, \$1.03, \$1.0212. \$1.03, \$1.0212. \$1.0412, \$.0234, \$1.0314, \$1.0134, \$1.0214. The highest point of the day was reached about 11 o'clock, and the advance which occurred then made the quotation \$1.0412. and was caused by a New York dispatch which reported that Russia had included wheat in the order prohibiting exports. The truth of the report was much doubted, however, as only one house here received any such news. The weakness which the market showed in the latter part of the session was due to the lower quotations frem the foreign markets. There was a short-lived spurt from \$1.0212 to \$1.0338 about ten minutes from the close, but it immediately became heavy again, and dropped to \$1.0212 at 1:15 P. M., when the bell tapped. December privileges for Wednesday were quoted around 99120 and

The corn market acted very stubborn all day. It was hopping up and down mostly between 63c and 64c, with extreme prices at 62c and 6512c for September. This future opened around 6318c, with sales at 63 26814c at the same time. The price touched 6234c, and rose to 631ge in short order. Then it sold at 631sc, and went with the bulge in wheat and covering of "shorts" to 6514c, to 6414c, to 6514c a third time before 1 o'clock. August sold mostly between 65c and 661gc. There was less action in the late futures. White & Co. and Hutchinson & Co. were the leading buyers, early followed by "shorts." The prospect of a squeeze in September corn continues, and makes

and closed 24c over last night. October ranged between 5734c and 6012c. September corn "puts" sold at 6234c, "cails" 6712c.

Corn "puts" sold at 6234c, "cails" 6712c.

Oats closed firm, 34c to 1c easier, after experiencing a moderately active day. Trade was of a scattering character. August opened at 29c, declined to 28c, and closed at 2814c. September sold from 291sc down to 2812c, closing at 2834c, while May started at 3214c, advanced to 3212c, weakened to 32c, and closed at 323sc.

A break of 6@712c occurred in rye. There was good buying of cash and selling of futures. Foreigners bought a moderate amount of cash, and at the same time sold.

amount of cash, and at the same time sold september freely. They also did considerable re-selling. August sold at 97c@\$1, and closed at 9612c, sellers. Septembe, sold at 95c@\$1, and closed at 95@96c; October was traded in at 92@9434c, and closed about 3c under. September No. 2 sold at 96c@\$1. The market was active and quite excited.

The market was active and quite excited.

The trade in provisions was fairly lively to-day. In pork the prices fluctuated considerably. Opening sales were made at 2½25c decline, followed by a further reduction of 2½c. At the reduction the demand improved and prices advanced 32½0 35c, later the prices settled back 10@12½c, and closed quiet. For lard the demand was only fair and the trading light. Prices opened .02½0.05c lowed, but rallied again and closed at outside figures, steady. Short ribs were fairly active. Prices ruled .02½0.05c lower at the opening, but quickly rallied again. Toward the close prices settled back to medium figures, but advanced back to medium figures, but advanced again and the market closed firm. The

Quotations at Philadelphia, Baltimore, Cincinnati, St. Louis and Other Points. ST. LOUIS, Aug. 18.-Flour-The market was steadier, but trade was light. Wheat -Traders fought shy of the market this morning, and as outside orders were rather slow the result was to restrict trading considerably. The lack of demand gave a weak undertone to the market, which, with declines elsewhere, caused prices to work 2c lower. Later the market rallied 2c on advance in corn, but weakened and closed at declines of 21sc for August and September, and 134c for December. No. 2 red, cash, 9914c; August, 983sc; September, 983sc; December, \$1.0212. Corn—Intense dullness was the most prominent feature of the market. The decline in wheat carried corn down, but a quick change in sentiment occurred when Chicago advanced. A strong demand developed for September that caused an advance of 2c. but the year weakened steadily, as all the pressure was to sell that option, and it closed ic below yesterday, as did January. # INDIANAPOLIS MARKETS.

Trade Improving as the Month Advances-

Prices Unsettled on Many Lines. INDIANAPOLIS, Aug. 18,-In the line of fruits and vegetables prices are in the main nominal, ranging with receipts and views of retail grocers as to their worth. Eggs and poultry are firm in tone and in good demand; the same is true of good butter. The bide market is again flat. An

Eastern paper says of this market: "The hide market is more quiet than ever, if such a thing is possible. There is absointely very little business in domestic hides, the tanners being determined not to put in hides till the leather market is better, as already mentioned above. The market on Western green-salted hides is very quiet." Package coffees, which went off 12c on Monday, are easy at that figure. Java coffees are in short supply and the drift of the markets is upward. Sugars are quiet and unchanged. Canned fruits are dull and slow, for the good reason that stock fresh from the tree is so abundant and cheap. Corn syrup is active and cromises to advance. The provision market is active, prices on most descriptions firm. The seed market is active at unchanged prices.

The local market is active. Dealers are moving with caution, more especially in wheat deals. Track bids to-day ruled as

Philadelphia Record. It is not safe to estimate the value and cost of a crop from estimates of the cost of seed, occupancy of land, labor and prices obtained only, as the cost also depends largely on the loss of fertility of the soil in the plant-food appropriated by the crop during its period of growth from the seed to maturity. A ton of wheat-straw takes from the soil a larger proportion of fertilizing matter than does a ton of potatoes, in fact twice as much, so far as its manurial value is considered. and the lower cost of the potatoes in that respect gives the potato crop an advantage, as two crops of potatoes can be grown with as little loss to the soil, in value of plantfood, as one crop of wheat-straw. Which

is the more profitable, however, depends on

the cost in other directions.

There is a wide range of the values of farm products when viewed from their importance as manures or fertilizers, as the plant-food taken by them represents its equivalent of manures. These values are based on the amounts of nitrogen, potash and phosphoric acid that enter into the composition of the plants; but, while some crops draw largely on the soil, they do not yield as heavily as many crops which require less plant-food proportionately. Wool takes from the soil a larger share of plant-food than any other product, as a comparison with wheat shows that the composition of a ton of unwashed wool contains 108 pounds of nitrogen, 146 pounds of potash and about two pounds of phosphoric acid, while wheat-grains, per ton, contain about thirtyseven pounds of nitrogen, ten pounds of potash and fifteen pounds of phosphorie acid-the manurial value of the wool being about \$25, while that of the wheat is only 88. A ton of wool, however, is much more valuable than a ton of wheat when offered for sale, but its cost is much greater of plant food.

Ot all foods procured off the farm and fed to stock cotton-seed meal possesses the highest manurial value, as a ton of cottonseed meal contains 135 pounds of nitrogen, 30 pounds of phosphoric acid, 56 pounds of potash, bran containing 40 pounds of nitrogen, 28 pounds of phosphoric acid and 54 pounds of potash. These substances are the most evenly balanced of all foods that enrich the land, and the farm will suffer but little loss if they are used as a portion of the ration for the stock. The farmer can, by noting the effects of certain crops on the soils, and growing such crops as may be best adapted thereto, with judgment in the selection o his stock foods, return to the soil all that
